

Capability Statement

WES Group is committed to **provide value solutions** for its customers and to provide cost savings, reduced delivery time, enhanced functionality, safety and with minimal environmental impact.

About Us

WES Group is a **multi-disciplined Electrical Contractor** specialising in **Design and Construction** Projects, Lighting Design, HVAC and Electrical Design. WES Group is a triple certified company. This high standard of endorsement guarantees our commitment to consistent delivery of **Quality, Safety and Environmentally** friendly solutions.

Our safety records coupled with the stability and reliability of our professional and qualified team, has led WES Group to position itself as a trusted company able to complete complex projects to the most exacting standards required. The zero lost time over that period is a direct testament to this.

We are a strong supporter of new technology and training, and our philosophy is to supply most skills and resources in house where possible. WES Group exceeds the expectations of the industry training guidelines and invests heavily to maintain this. As a consequence our companies have many accreditations and a significant inventory of high tech tools and test equipment.

The majority of our workforce is home grown and has been committed to us for extended periods of time. Our overall commitment to all staff is to keep them happy and safe whilst they prosper, working on the most dynamic projects in Australia.

"I feel that our growth is a direct reflection of the quality of our work, the consistency of our delivery along with our continuing commitment to safety and the environment. Quite simply, our clients trust us, and know that we won't let them down." **Ian Grayson, Managing Director**

"WES Group is well known for consistently delivering quality and value to any project."

Our Services

Design and Construction

As a Multi Disciplined Electrical Contractor: WES Group provides **full detailed design** and drafting services and / or supplement owner/consultant designs to identify **value opportunities** through engineering and constructability reviews. WES Group provides a turn-key solution for projects of any size. Experienced in Lighting Design, HVAC, Electrical Design, Dry Fire Systems, Lightning Protection, Earthing, Nursecall, Data and Communications.

- Underground Cabling

HVAC

(Heating, Ventilation and Air-conditioning). WES Group supports our customers through our specialist services covering small capital works, preventative, routine and breakdown maintenance and energy management.

HVAC is important in the design of medium to large industrial and office buildings and in marine environments, where safe and healthy building conditions are regulated with respect to temperature and humidity, using fresh air from outdoors. Its goal is to provide thermal comfort and acceptable indoor air quality.

- Mechanical ventilation and air-conditioning – complex cooling and heating systems.
- **Preventative maintenance programs**, taking care of our customers Air-conditioning and mechanical services assets.
- **Design and construction** of mechanical, ventilation and air-conditioning, systems.

Our Services

“the company has many accreditations and a significant inventory of high tech tools, and testing equipment.”

Fire

- Dry Fire System Design
- Maintain existing Fire Alarm Systems with continued ongoing inspection under Australian Standard
- Supply and Install Fire Alarm Systems

Security

- Back to Base Monitoring
- Retro fit to existing Alarm Systems
- Systems Integrations Control of Security, Access/Lift Control, Closed Circuit Television (CCTV) and Intercommunication Systems
- Electronic Access Control Systems
- Intercom Systems

Specialist Medical and Dental

- Nursecall Systems
- Patient Protection Systems
- Medical Services Panels
- Backup Power Generation

Projects

Industrial

WES Group's experience in industrial projects includes conveyor systems, ship loaders, stacker reclaimers, rail facility refurbishments and upgrades, MCC replacements and upgrades and HV installations.

WES Group has the depth of experience and financial capacity to undertake major projects throughout Australia. We pride ourselves on a strong track record of managing and delivering even the most complex of projects to the most exacting standards. We appreciate all clients that have provided WES Group with the opportunity to showcase their projects, to work with them and to continue to foster even stronger bonds.

**“WES Group has the capacity and experience to
deploy teams to deliver projects nationally.”**

Management Systems

WES Group is committed to ensuring all work is completed on time, and on budget, with no loss time to injury by:

- Ensuring that staff has adequate equipment and procedures to work safely.
- Maintaining a safe environment for customers when work is being conducted.
- Ensuring that all completed work is tested and safe.
- Maintaining the competency and skill of staff at a high level.
- Only using staff that are competent and are skilled in carrying out the relevant activity.
- Complying with all regulatory requirements.
- Regularly auditing the works to ensure compliance with company policies and National Standards.

This is achieved by identifying and rectifying any unsafe work conditions and or practices, as well as promoting safe working environment.
